

# Palm Touch Patrol Starter Kit

The MiniTool Palm Touch Reader is a versatile patrol reader which reads Stainless Steel Touch Button Checkpoints. The Checkpoints are extremely robust and are designed for External and Internal locations.

Due to its flexibility the L9000D Data Reader is used in numerous applications, from standard Guard Tour, to Duty of Care reporting and providing proof that buildings are being maintained or cleaned.

Combined with the unlimited A1 Patrol Management software the Palm Touch Data Reader provides accurate and detailed reporting on all activity. With the addition of an event book, you can also produce information on activity during your operative's tour. Once downloaded to your PC via the interface cable, within seconds you have access to all of your reports which can be viewed on screen, printed and emailed.

The Palm Touch Data Reader has a durable vandal resistant metal case, Long-life lithium metal battery (typical life 700,000 reads/two years and an internal memory of up to 10000 records. As with all of our systems the L9000D comes with a full 2 Year warranty.

10,000 Event internal flash memory
